

JADEPROTEC® ANTISKID S.

Waterproof, slip-resistant coated paper or cardboard with slip angle $>65^\circ$ (TAPPI T-815), for protection and stabilisation of palettised goods.

JadeProtec® Antiskid S is the result of innovative coating technology - an effective barrier provides additional protection against moisture and water. The slip angle of >65 degrees makes Jade-Protec® Antiskid the best performing product on the market. Production and transport processes can be significantly optimized. Realization of potential savings through reduced use of stretch film.

Foodsafe

100% recyclable

Applications

Interlayer for pallet stability in packaging of food, tissues, in beverage packaging, for dairy and bagging operations. Supplied as sheets for manual removal as well as for applications in fully automatic packing lines. With excellent layflat properties and very good separation for automatic processing. Supplied as roll for all slitter rewinders.

Standards
