SURFACE PROTECTION

WATER-REPELLENT

Antiskid paper or board for all types of industrial applications. Protects and stabilizes palettised goods – Slip angle > 65 degrees, making JadeProtec® Antiskid the best product on the market. For further optimizing production and logistics processes. Saving potentials can be realized by reducing stretch film.

APPLICATION

Interlayer for palettising, stability in pallets for food, tissues, bottling lines, filling lines, metal parts production, automotive, dairies, bagging. Supply in sheets for manual processing as well as in fully automatic systems, perfect flatness. Supply in reels, suitable for all automated and semi-automated sheeter types.
